

CSCC63 – WEEK 7 TUTORIALS

1. Prove that NP and co-NP are closed under the concatenation operation.

I.e., prove that if L_1, L_2 are in NP, then so is $L_1 \cdot L_2$ (the concatenation of L_1 with L_2).
Similarly, prove that if L_1, L_2 are in co-NP, then so is $L_1 \cdot L_2$.
